Continuation of 2. NOTE: the proposed amendment raises new issues that would require new search and/or consideration as it recites the concentration range of CLA of from 2 to 90% by weight. Further, the recited range is not supported by the specification and, thus, raises the issue of new matter. The specification discloses the range of 0.5-70% by weight, preferably 1-30% by weight, more preferably 2-5% by weight. See p. 4, lines 19-23.
